

It's easy to view and order wedding pictures online. You have lots of ways to navigate the site and order pictures. Most of them are pretty intuitive once you've visited the site for awhile. To get you started, I've written instructions for the most common ways below.

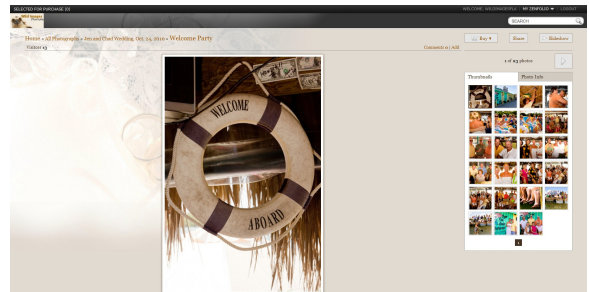

1. Visit <http://wildimagesfla.zenfolio.com/jenchad> to open the Jen & Chad Wedding page. You'll see six pictures (galleries) related to the wedding events.

2. Click any picture to open and view all of the photos in that gallery.

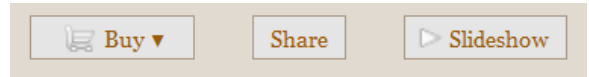

Here are all the pictures in the Welcome Party gallery.

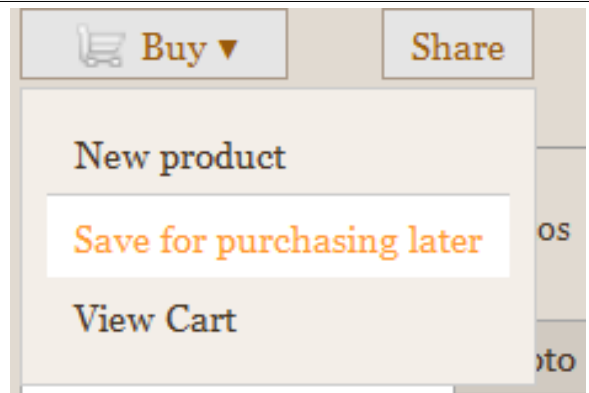

3. Click any picture to open it on its own page. When you do, you'll see that there are small pictures (thumbnails) of every other picture in the gallery. (You can click any thumbnail to open its own picture page, if you want).

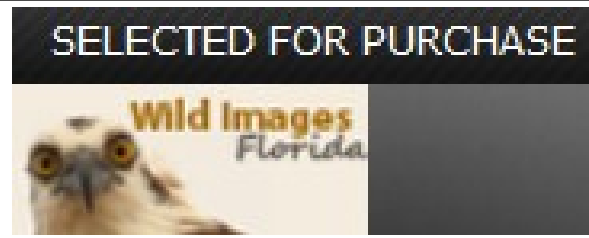

4. The buttons in the top right area of the screen enable you to **Buy** and **Share** the photo. Or, you can click the **Slideshow** button to launch a slideslow, with music.

5. Collecting your favorite pictures (so you can review them later) is easy. Just click the Buy button, and then select **Save for purchasing later**.

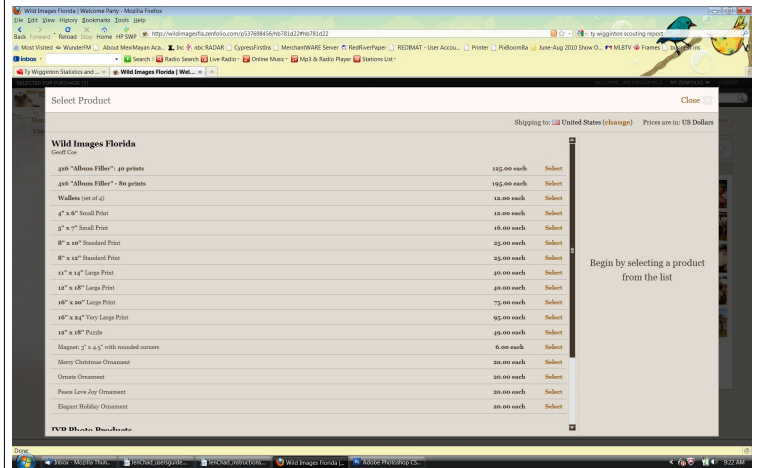

6. Once you have saved a picture, you'll see a new link—**SELECTED FOR PURCHASE**-- on the top left of the page. This link will display even if you leave the page you're viewing now, and even if you shut down your computer and come back later.

7. To order a picture, go to its picture page. Then click **Buy**, and select **New Product**.

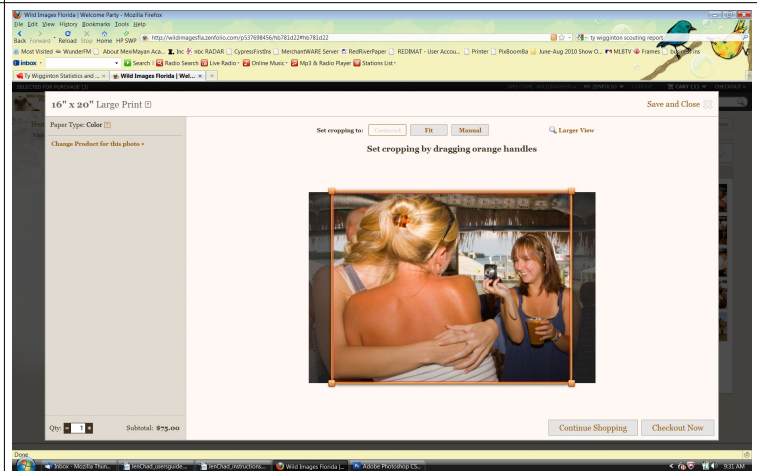

8. The **Select Product** page opens, displaying all the individual photo sizes you can choose, and prices for each. Click **Select** to add an item to your Shopping Cart. Use the scrollbar just to the right of the Select column to view additional products (such as coasters and key chains).

You'll notice, at the top, two "Album Filler" products. I've created these just for this wedding, so you can make your own collection of 40 or 80 favorites. I'll describe how to create those on the next page.

9. When you click **Select**, you'll be presented with options for reviewing the cropping of the photo. Just follow the on-screen instructions.

If you have chosen the wrong size, don't worry: just click the **Change Product for this photo** link (on the left hand side of the page) and you'll get a "do-over."

Otherwise, to continue looking at photos click **Continue Shopping**. Or, when you're ready to check out, click **Checkout Now**.

10. When you do, the Shopping Cart will open. Most everyone has used a Shopping Cart by now, so I won't take the time to document that part.

ENJOY!

To order an "Album Filler":

1. Find the first photo you want to add to the Album Filler. Click **Buy**, and then click **New Product**.

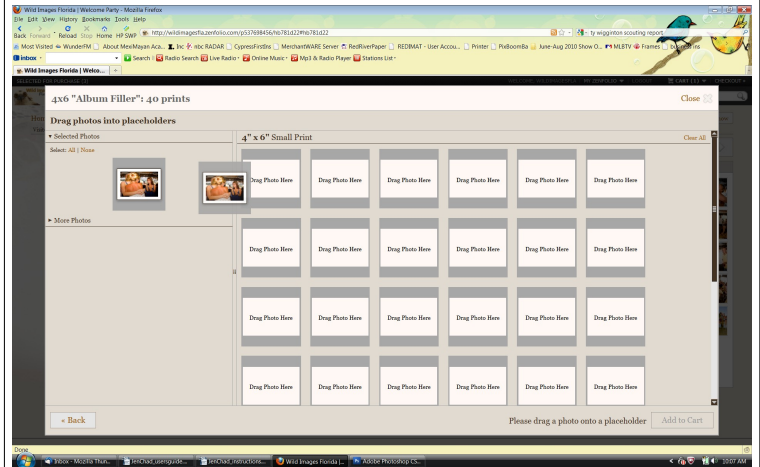

2. On the Select Product page, choose the item you want (40- and 80-print sizes are available).

3. In the Quantity area, choose the number of "Album Fillers" you want, and then click **Continue**.

4. Click and drag the photo into one of the placeholders on the right side.

Tip: Click **More Photos** to have the webpage display *all* of the photos in the gallery you are currently viewing. Then click and drag them into the placeholders, as described previously.

To select more than one picture at a time, press down the **Ctrl** or **Shift** key as you click the thumbnails. Then drag the group of photos into the placeholders. (The Shift key will select all pictures between the first thumbnail you click and the second one. The Ctrl key will select *any* individual thumbnail you click, even if it's not next to the others.)

3. Continue until all placeholders are filled. Then, click **Add to Cart**.
